

[After having obtained all the necessary approvals for the transaction](#)

Iberdrola completes the sale of its business in Hungary and receives €171 million

- *Total consideration for the sale of 158 MW of operational wind capacity includes €171 million, including €128 million for the shares of the company and €43 million through a dividend distributed prior to closing.*
- *The transaction aligns with the company's strategy to focus investments on its core businesses -mainly networks regulated or long-term contracted generation- and on key markets like the United States and the United Kingdom*

Iberdrola has completed the sale of its business in Hungary, after obtaining all the necessary approvals to carry out the transaction. The company has sold 100% of the shares of Iberdrola Renovables Magyarország KFT, the owner of its business in Hungary, to a consortium formed by Premier Energy—who previously acquired the company's assets in Romania in 2024—and a subsidiary of the Hungarian group iG TECH Capital. Through this transaction, the Group has received a total €171 million, including the price for the shares of the company and a dividend distributed prior to closing.

The assets sold include 158 megawatts (MW) of operational wind capacity, commissioned by Iberdrola since entering the country in 2008. 124 MW of this total capacity is already selling their energy in the free market after completing the regulatory 15-year tariff period, and the remaining 34 MW will do so in less than a year.

This deal is part of Iberdrola's strategy to focus its investments on its core businesses -mainly regulated networks or long-term contracted generation- and on key markets like the United States and the United Kingdom. Following this strategy, Iberdrola Energia Internacional has set as investment priorities other EU markets and Australia.

About Iberdrola

With a capitalisation of 125,000 million euros, Iberdrola is the largest electricity company in Europe and one of the two largest in the world. The Group serves more than 100 million people worldwide and has a workforce of more than 44,000 employees and assets of more than 160,000 million euros. In 2024, Iberdrola recorded revenues of almost 50,000 million euros, a net profit of 5,600 million euros. The company contributes nearly 10,300 million euros in tax contributions in the countries in which it operates and supports more than 500,000 jobs in its suppliers thanks to purchases that exceeded 18,000 million euros in 2024.

Since 2001, Iberdrola has invested more than 175,000 million euros in electricity grids, renewable energies, and energy storage to contribute to the creation of an energy model based on electrification. The company has nearly 1.4 million km of power grids in the United States (New York, Connecticut, Maine and Massachusetts), the United Kingdom (Scotland, England and Wales), Brazil (Bahia, Rio Grande do Norte, Pernambuco, São Paulo and Mato Grosso do Sul, as well as Brasília) and Spain, as well as 57,000 MW of capacity worldwide of which more than 45,000 MW are renewable.
