

Iberdrola France completes the sale of its onshore portfolio in the country

- *The transaction is aligned with the Iberdrola Group's strategy of focusing its investments on its core businesses – primarily regulated networks or generation with long-term contracts – and on key markets such as the United States and the United Kingdom*

Iberdrola France has completed the sale of its onshore portfolio in the country with the French renewable energy group Technique Solaire.

The assets include 118 megawatts (MW) of operational wind capacity, as well as a pipeline of 639 MW of onshore wind and solar PV.

This transaction forms part of Iberdrola Group's strategy to focus its investments on its core businesses –mainly regulated networks or generation with long-term contracts– and on key markets such as the United States and the United Kingdom.

This is the fifth transaction completed by Iberdrola so far this year, following the sale of mini-hydro assets and the slurry business in Spain, the sale of Hungary and the addition of 650 MW of solar power to the joint venture with Norges.

About Iberdrola

With a capitalisation of 135,000 million euros, Iberdrola is the largest electricity company in Europe and one of the two largest in the world. The Group serves more than 100 million people worldwide and has a workforce of 46,000 employees and assets of more than 160,000 million euros. In 2024, Iberdrola recorded revenues of almost 50,000 million euros, a net profit of 5,600 million euros. The company contributes nearly 10,300 million euros in tax contributions in the countries in which it operates and supports more than 500,000 jobs in its suppliers thanks to purchases that exceeded 18,000 million euros in 2024. Since 2001, Iberdrola has invested more than 175,000 million euros in electricity grids, renewable energies, and energy storage to contribute to the creation of an energy model based on electrification. The company has nearly 1.4 million km of power grids in the United States (New York, Connecticut, Maine and Massachusetts), the United Kingdom (Scotland, England and Wales), Brazil (Bahia, Rio Grande do Norte, Pernambuco, São Paulo and Mato Grosso do Sul, as well as Brasília) and Spain, as well as 57,000 MW of capacity worldwide of which more than 45,000 MW are renewable.
